

Update on the Dengue Situation in the Western Pacific Region & the Americas

This report describes the epidemiology of dengue in the **World Health Organization** Western Pacific Region and the Americas. [Western Pacific region data](#) are compiled from open sources (national indicator-based surveillance systems) with the exception of Cambodia, Lao People's Democratic Republic, Viet Nam, and the Philippines, where data are provided from WHO Country Offices, and for Pacific Island Countries, where syndromic surveillance data are provided by **WHO's Division of Pacific Technical Support**. Data from the Americas are drawn from the **Pan American Health Organization's** [PLISA Health Information Platform for the Americas](#). Data for Indonesia, Thailand, and Myanmar are drawn from **ASEAN Biodiaspora Virtual Center's** [weekly reports](#). Information is reported based on countries' standard dengue case definitions. Due to differences in surveillance methods and reporting practices, a comparison of trends between countries and areas is not possible, however national trends can be observed over time.

Western Pacific - Northern Atmosphere

Cambodia

As of Week 22 of 2024, 343 cases with 2 deaths were reported, for a total of 5927 cases and 22 deaths to date.

China

As of Week 22 of 2024, 58 cases with 0 deaths were reported, for a total of 165 cases and 0 deaths to date.

Indonesia

During epidemiological Week 21 of 2024, there were 4692 dengue cases reported. 24 dengue-related deaths were reported in Week 21. The cumulative number of dengue cases reported to date is 109597 cases. As of epidemiological Week 21, a total of 720 deaths due to dengue have been reported.

Laos PDR

During epidemiological Week 22 of 2024, there were 175 dengue cases reported. 0 dengue-related deaths were reported in Week 22. The cumulative number of dengue cases reported to date is 3259 cases. As of epidemiological Week 22, a total of 0 deaths due to dengue have been reported.

Malaysia

In Week 21 of 2024, 2426 dengue cases and 4 deaths were reported. The cumulative number of cases reported in 2024 (as of epidemiological Week 21) is 62107. There have now been 46 deaths reported in 2024.

Myanmar

During epidemiological Week 28 of 2023, there were 4968 dengue cases reported. 23 dengue-related deaths were reported in Week 28. The cumulative number of dengue cases reported to date is 6685 cases. As of epidemiological Week 28 of 2023, a total of 30 deaths due to dengue have been reported.

Philippines

During epidemiological Week 48 of 2023, there were 2607 dengue cases reported. 82 dengue-related deaths were reported in Week 48. The cumulative number of dengue cases reported to date is 195603 cases. As of epidemiological Week 48, a total of 657 deaths due to dengue have been reported.

Singapore

During epidemiological Week 22 of 2024, there were 313 dengue cases reported. 0 dengue-related deaths were reported in Week 22. The cumulative number of dengue cases reported to date is 8033 cases. As of epidemiological Week 22, a total of 0 deaths due to dengue have been reported.

Thailand

In Week 22 of 2024, 1040 dengue cases and 2 deaths were reported. The cumulative number of cases reported in 2024 (as of epidemiological Week 22) is 33133. There have now been 32 deaths reported in 2024.

Viet Nam

During epidemiological Week 23 of 2024, there were 1272 dengue cases reported. 0 dengue-related deaths were reported in Week 23. The cumulative number of dengue cases reported to date is 23614 cases. As of epidemiological Week 23, a total of 3 deaths due to dengue have been reported.

Western Pacific – Southern Atmosphere

Australia

During epidemiological Week 21 of 2024, there were 273 dengue cases reported. 0 dengue-related deaths were reported in Week 21. The cumulative number of dengue cases reported to date is 1020 cases. As of epidemiological Week 21, a total of 0 deaths due to dengue have been reported.

Cook Islands

As of epidemiological Week 17 of 2022, 4 dengue cases were newly reported, leading to a total of 23 cases. 0 dengue-related deaths were reported in 2022, for a total of 0 dengue-related deaths.

French Polynesia

During epidemiological Week 8 of 2022, there were 0 dengue cases reported. 11 dengue-related deaths were reported in Week 8. The cumulative number of dengue cases reported to date is 0 cases. As of epidemiological Week 8, a total of 0 deaths due to dengue have been reported.

New Caledonia

As of epidemiological Week 9 of 2024, 0 dengue cases were newly reported, leading to a total of 6 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Wallis and Futuna

In Week 45 of 2021, 0 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2021 (as of epidemiological Week 45) is 68. There were 0 deaths reported in 2021.

The Americas

Antigua and Barbados

During epidemiological Week 16 of 2024, there were 0 dengue cases reported. 0 dengue-related deaths were reported in Week 16. The cumulative number of dengue cases reported to date is 41 cases. As of epidemiological Week 16, a total of 0 deaths due to dengue have been reported.

Argentina

As of epidemiological Week 22 of 2024, 6489 dengue cases were newly reported, leading to a total of 504580 cases. 12 dengue-related deaths were reported this week, for a total of 355 dengue-related deaths to date.

Aruba

As of Week 12 of 2024, 2 cases with 0 deaths were reported, for a total of 16 cases and 0 deaths to date.

Bahamas

As of epidemiological Week 6 of 2024, 0 dengue cases were newly reported, leading to a total of 0 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Barbados

In Week 18 of 2024, 320 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2024 (as of epidemiological Week 18) is 1260. There have now been 0 deaths reported in 2024.

Belize

In Week 22 of 2024, 18 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2024 (as of epidemiological Week 22) is 665. There have now been 0 deaths reported in 2024.

Bermuda

During epidemiological Week 4 of 2024, there were 0 dengue cases reported. 0 dengue-related deaths were reported in Week 4. The cumulative number of dengue cases reported to date is 0 cases. As of epidemiological Week 4, a total of 0 deaths due to dengue have been reported.

Bolivia

During epidemiological Week 20 of 2024, there were 11383 dengue cases reported. 5 dengue-related deaths were reported in Week 20. The cumulative number of dengue cases reported to date is 36747 cases. As of epidemiological Week 20, a total of 14 deaths due to dengue have been reported.

Brazil

As of epidemiological Week 23 of 2024, 77533 dengue cases were newly reported, leading to a total of 8121361 cases. 3 dengue-related deaths were reported this week, for a total of 3910 dengue-related deaths to date.

Canada

As of epidemiological Week 23 of 2024, 0 dengue cases were newly reported, leading to a total of 0 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Cayman Islands

As of Week 14 of 2024, 0 cases with 0 deaths were reported, for a total of 3 cases and 0 deaths to date.

Chile

During epidemiological Week 23 of 2024, there were 24 dengue cases reported. 0 dengue-related deaths were reported in Week 23. The cumulative number of dengue cases reported to date is 154 cases. As of epidemiological Week 23, a total of 0 deaths due to dengue have been reported.

Colombia

During epidemiological Week 23 of 2024, there were 9628 dengue cases reported. 7 dengue-related deaths were reported in Week 23. The cumulative number of dengue cases reported to date is 175962 cases. As of epidemiological Week 23, a total of 81 deaths due to dengue have been reported.

Costa Rica

As of epidemiological Week 23 of 2024, 578 dengue cases were newly reported, leading to a total of 9912 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Cuba

In Week 26 of 2022, 2586 dengue cases and 1 deaths were reported. The cumulative number of cases reported in 2022 (as of epidemiological Week 26) is 3036. There have now been 1 deaths reported in 2022.

Dominican Republic

As of Week 23 of 2024, 127 cases with 0 deaths were reported, for a total of 8790 cases and 23 deaths to date.

Ecuador

As of epidemiological Week 22 of 2024, 1986 dengue cases were newly reported, leading to a total of 35189 cases. 7 dengue-related deaths were reported this week, for a total of 44 dengue-related deaths to date.

El Salvador

As of epidemiological Week 23 of 2024, 182 dengue cases were newly reported, leading to a total of 2860 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Grenada

As of Week 23 of 2024, 9 cases with 0 deaths were reported, for a total of 173 cases and 0 deaths to date.

Guadeloupe

As of epidemiological Week 23 of 2024, 60 dengue cases were newly reported, leading to a total of 3745 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Guatemala

As of epidemiological Week 23 of 2024, 1919 dengue cases were newly reported, leading to a total of 27951 cases. 0 dengue-related deaths were reported this week, for a total of 10 dengue-related deaths to date.

Guyana

As of Week 23 of 2024, 185 cases with 2 deaths were reported, for a total of 17496 cases and 4 deaths to date.

Honduras

As of Week 21 of 2024, 2802 cases with 0 deaths were reported, for a total of 25859 cases and 20 deaths to date.

Jamaica

In Week 19 of 2024, 43 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2024 (as of epidemiological Week 19) is 1266. There have now been 0 deaths reported in 2024.

Martinique

As of Week 23 of 2024, 40 cases with 0 deaths were reported, for a total of 5665 cases and 0 deaths to date.

Mexico

During epidemiological Week 23 of 2024, there were 5731 dengue cases reported. 0 dengue-related deaths were reported in Week 23. The cumulative number of dengue cases reported to date is 83997 cases. As of epidemiological Week 23, a total of 26 deaths due to dengue have been reported.

Montserrat

During epidemiological Week 17 of 2024, there were 0 dengue cases reported. 0 dengue-related deaths were reported in Week 17. The cumulative number of dengue cases reported to date is 1. As of epidemiological Week 17, a total of 0 deaths due to dengue have been reported.

Nicaragua

As of epidemiological Week 5 of 2024, 7411 dengue cases were newly reported, leading to a total of 17339 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Panama

As of epidemiological Week 22 of 2024, 278 dengue cases were newly reported, leading to a total of 7087 cases. 0 dengue-related deaths were reported this week, for a total of 12 dengue-related deaths to date.

Paraguay

As of Week 23 of 2024, 1247 cases with 0 deaths were reported, for a total of 284502 cases and 100 deaths to date.

Peru

As of epidemiological Week 23 of 2024, 3375 dengue cases were newly reported, leading to a total of 249843 cases. 4 dengue-related deaths were reported this week, for a total of 207 dengue-related deaths to date.

Puerto Rico

As of Week 22 of 2024, 91 cases with 1 death were reported, for a total of 1408 cases and 2 deaths to date.

Saint Barthelemy

In Week 23 of 2024, 3 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2024 (as of epidemiological Week 23) is 138. There have now been 0 deaths reported in 2024.

Saint Kitts and Nevis

During epidemiological Week 23 of 2024, there were 0 dengue cases reported. 0 dengue-related deaths were reported in Week 23. The cumulative number of dengue cases reported to date is 175 cases. As of epidemiological Week 23, a total of 0 deaths due to dengue have been reported.

Saint Lucia

As of epidemiological Week 22 of 2024, 0 dengue cases were newly reported, leading to a total of 7 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Saint Martin

As of epidemiological Week 23 of 2024, 10 dengue cases were newly reported, leading to a total of 525 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Saint Vincent and the Grenadines

As of epidemiological Week 17 of 2024, 0 dengue cases were newly reported, leading to a total of 2 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Sint Maarten

As of epidemiological Week 12 of 2024, 12 dengue cases were newly reported, leading to a total of 115 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Suriname

As of Week 20 of 2024, 10 cases with 0 deaths were reported, for a total of 95 cases and 3 deaths to date.

Trinidad and Tobago

As of epidemiological Week 5 of 2024, 41 dengue cases were newly reported, leading to a total of 87 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Turks and Caicos Islands

As of epidemiological Week 12 of 2024, 47 dengue cases were newly reported, leading to a total of 74 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

United States

As of epidemiological Week 23 of 2024, 46 dengue cases were newly reported, leading to a total of 725 cases. 0 dengue-related deaths were reported this week, for a total of 0 dengue-related deaths to date.

Uruguay

In Week 22 of 2024, 12 dengue cases and 0 deaths were reported. The cumulative number of cases reported in 2024 (as of epidemiological Week 22) is 701. There have now been 2 deaths reported in 2024.

Venezuela

As of Week 21 of 2023, 384 cases with 2 deaths were reported, for a total of 4809 cases and 8 deaths to date.

Virgin Islands UK

During epidemiological Week 52 of 2023, there were 2 dengue cases reported. 0 dengue-related deaths were reported in Week 52. The cumulative number of dengue cases reported to date is 7 cases. As of epidemiological Week 52, a total of 0 deaths due to dengue have been reported.

Virgin Islands US

As of Week 23 of 2024, 0 cases with 0 deaths were reported, for a total of 6 cases and 0 deaths to date.
